#### Letter from the President

Here at Salisbury University, 2016-17 was another banner academic year. As I begin my 18th year here, I am more convinced than ever that Salisbury University has risen to the ranks of the very best institutions of higher learning in our nation. We have students, faculty and staff who continue to earn national and international recognition; and we have alumni and friends like you, who continue to invest in the University with your time, talents and financial support. We could not be more grateful.

For some two decades, SU has been one of the best colleges in the country, according to The Princeton Review and U.S. News & World Report. We also are a "best value" in publications including Money, Forbes and Washington Monthly.

Three students recently earned prestigious Fulbright Awards to conduct neuroscience research in Sweden and teach English in Mongolia and Thailand. Our professors also continue to shine with two earning the University System of Maryland's highest faculty accolade: the 2017 Regents' Award for Excellence, Dr. Stephen Habay of the Chemistry Department was honored for teaching; Dr. Michèle Schlehofer of the Psychology Department was lauded for public service. SU students benefit from a committed faculty who are dedicated to providing excellent opportunities for exploration in the classroom, the lab, the surrounding community and around

We also continue to see many physical changes on campus, providing students, studentathletes and coaches the excellent facilities they deserve. Last fall, we opened the \$117 million Patricia R. Guerrieri Academic Commons, made possible by a generous \$8 million gift from the Guerrieri Family Foundation in honor of alumna Patti Lou Guerrieri. Architects have said that the new building is at the leading edge of a national resurgence in academic libraries. I can attest that for students and faculty alike it certainly has become a favorite campus "hang out." Last fall, we also cut the ribbon on a turf field and video scoreboard at the new Sea Gull Stadium. In February, we played our first home game at a hugely improved Softball Stadium. With more athletics complex upgrades on the horizon, SU will boast some of the best outdoor facilities in all of Division III.

Last spring, I announced a \$5.5 million gilt from Dave and Patsy Rommel to support SU's new Center for Entrepreneurship in downtown Salisbury and other activities of the Franklin P. Perdue School of Business. This special investment supports the economic development efforts of SU and the surrounding community by providing a place for new business ideas and collaboration to grow.

The SU Foundation, Inc. also is thinking about the future with the recent purchase of some 8.5 acres of land south of main campus on Route 13. The location gives the University flexibility in the short and long term for growth and expansion. It also bolsters our campus footprint to its largest size to date, just over 200 acres. The University also purchased the former Tri-State Engineering building on Milford Street as a new home for our growing threedimensional arts programs, including glass blowing, sculpture and ceramics. With its 12,000square-foot shop, nearly 3,000-square-foot office building and 1.18 acres of land bordering campus, this acquisition will more than double the space currently available at Fulton Hall.

I encourage you to come back to see the many changes on campus and also to reconnect with faculty, staff and fellow alumni who made a difference in your life during your time at Salisbury University. Thank you for your continued support of Salisbury University and Hook forward to seeing you on campus soon.

Janet Dudley-Eshhach, Ph.D. President, Salishury University

The SUMagazine is published annually for alumni and friends of Salisbury University by the Office of Alumni Relations and Annual Giving in conjunction with the Office of Public Relations, with the generous support of the Salisbury University Foundation. Please send comments, news and address changes to:

Office of Akımni Relations and Annual Givina Solisbury University 1120 Comden Avenue, Salisbury, MD 21801-6837 call 410.543.6042 (tall free 888.729-2586) or email olumni@salisbury.edu

Salisbury University has a strang institutional commitment to diversity and equal educational opportunities. To that end, the University prohibits discrimination on the basis of sex, gender, marital status, pregnancy, roce, calar, ethnicity, national origin, age, disability, genetic information, religion, sexual orientation, gender identity or expression, veteran status, or other legally protected characteristics. Direct all inquires regarding the nand-scrimination policy to the Office of Institutional Equity/Title IX Coordinator, Holloway Hall 100, 410-543-6426. Qualified students with disabilities should contact the Office of Student Disability Support Services of 410-677-6536. LINEVERSITO STEEM

# Kristen Visbal: Sculpting a Life in Art

By Richard Culver '70

Kristen Visbal '95, creator of the "Fearless Girl" sculpture, ushers me into her studio shortly after the *Delaware News Journal* photographer leaves. She has seven interviews throughout the day, from the BBC to *SUMagazine*. (That's me.)

The old house with brownish taupe siding and red trim, situated in the center of a Lewes, DE, vineyard, is inviting. She somehow has managed to dress the shady yard with coleus, begonias and other flowers before the onslaught of reporters. For weeks, she has been inundated with calls, emails and letters, following the sudden celebrity and controversy over her latest work.

We settle into a narrow, welcoming office fronting her studio. She listens politely to my questions, and as her enthusiasm grows, her voice resonates with passion. Direct, honest and determined, she has needed to be. As Sondheim wrote, "Art isn't easy ...."

"When my Mom died, which was just a few years ago," Visbal said, "I started reading a lot of the works of Elizabeth Kubler-Ross." The final statement of one of her books hangs on the studio refrigerator. "As she says, it is very important that you do only what you love to do. You may be poor, you may go hungry, you may live in a shabby place, but you will totally live."

"I am an artist through and through," Visbal continued. "And I can't tell you that I always love it. It's a hard life. It's a million hours. I've given up a lot of fun times and celebrations because I'm trying to make some deadline. I live the majority of my life

in these four walls. And it's a lot of labor."

For 19 years, Visbal has been building a reputation as a public artist with an impressive portfolio of large outdoor sculptures. Salisbury University was where she discovered her medium. A nontraditional student, she had studied at the universities of Arizona and Maryland College Park. She worked for a few years in metropolitan Washington, D.C., for Omni Hotels. She enjoyed a successful career and life, but something was missing. Her parents had built a summer home in South Bethany and had been coming to the Shore from the time she was 11. "I always felt very peaceful here," she said. "I remember taking a vacation in February. I was walking on the beach, and it was just stormy and beautiful. And I thought ... I want to live here." She quit the city and made the move. At age 30, she started art classes at nearby SU to finish her degree (summa cum laude).

Marie Cavallaro was chair of the Art Department and taught Visbal ceramics. Cavallaro remembers her now famous student as a self-starter with focus and passion. "Marie was great," Visbal said, "because she let me do my own thing." Lucy Rabine, a young artist and adjunct faculty, had even more impact. A photograph of an early abstract work from a Rabine three-dimensional arts class still hangs in Visbal's studio. Rabine introduced her to Turner Sculpture in Onley, VA, where she did a brief internship after graduation. Turner's staff pointed her to the prestigious Johnson Atelier in Mercerville, NJ, which

offered internationally competitive apprenticeships. There wasn't a lot of money, but she survived and learned about lost wax bronze casting during three years there. She also sold her first piece, "Girl Chasing Butterflies," to Merrill Lynch. Afterward, she set up studio in Lewes.

Visbal's ongoing love of water shows in her work. She has water-themed sculptures in Myrtle Beach, SC, and at beaches in Florida. Another, of Olympic runner Bob Hayes, led to one of her largest commissions, "The Cradle of Coaches," at Miami University, OH, featuring 10 larger than life-sized figures. "I like to take motion and push it beyond the boundaries of reality," Visbal said. Her first statue of Alexander Hamilton, for Hamilton, OH, has a billowing cape framing him. Wind almost seems to be part of the sculpture. The U.S. Coast Guard Academy has commissioned her to do a second Hamilton.

"Fearless Girl" came when State Street Global Advisors, an asset management company, wanted to highlight the need for

more women in corporate leadership. Their idea of a girl, fists on hips, positioned in front of the famed "Charging Bull" sculpture near Wall Street, has been hailed as a stroke of advertising genius. But success wasn't guaranteed. They were on a tight deadline and needed an artist who also could model children. Several of Visbal's bronzes feature children and Johnson Atelier, now Digital Atelier, recommended her.

Surprisingly, one of the world's most popular statues was created in a few weeks. "They called me on November 30 (2016)," she said. "I did 11 mock-ups or sketches, and three of those showed the girl at different sizes in front of 'Charging Bull.' And I did five different hairstyles. Visbal also worked with two different girls as models, the daughter of a friend in Wilmington and a "beautiful Latina girl" who lived nearby. December was devoted to sketching. The clay model was sculpted in three weeks - she finished it on January 21, the day of the Women's March in Washington. On January 30, the mold and wax cast was ready for her to check. "I was up all night long working on it, and it was delivered to the Baltimore foundry (New Arts) the next night." After it was cast in bronze, she did the metal check on February 28, and it was installed capturing international headlines - on March 6.

The roster of technical details – from digital milling to sculpting with pipe insulation foam, revising and refining, calculating the color tones in bronze alloys, and finishing with a patineur – sounds exhausting. At this stage in her career, however, they are simply maker process.

"I haven't gotten as much done since Mom died," said Visbal, reflecting on other recent works. Her father, "an amazing diplomat," and her mother had four children. He died when she was planning her move to the Shore. "My mother was a really great artist," Visbal said. "She actually won a Fulbright to study 17th-century Dutch art history in Holland ... and spent a summer in Paris (before her marriage)." As a painter, "She flip-flopped between realism and the abstract," Visbal added.

And this is something her daughter wants to do: "I'm looking to break out of the box."

If, following her mother's death, Visbal found solace in Kubler-Ross, she also found hope, unexpectedly, in "Fearless Girl."

"When I go up to New York City, there's always a bunch of little girls around getting in the power pose or looping their arm into (hers) ... and it's so great. It's setting the example of power and strength for them. After all, they are our future."

In February, a particularly exhausting time, Visbal asked herself, "Is it really worth it? But it goes back to Kubler-Ross. I don't think I could do anything else.

"You don't go into art to make money or to have a balanced life. ... I go out and

have a good time with my friends and blow off steam every now and then, but ... You cannot create without being alone, I don't think."

She momentarily smiles to herself and her voice softens. "There have been a lot of people in my life who have helped me, and I'm grateful for them. I think my career is working exactly as it was intended. When I became a sculptor, everything just lined up the way it was supposed to, and I knew I was doing the right thing."

# SU Medical Simulation: Exceptional Education for Students and the Community

By Katie M. Curtin

When Salisbury University's Richard A. Henson Medical Simulation Center opened in 2011, it had one robotic child patient, "Chuckie." An early-generation, high-fidelity manikin, he wasn't very life-like and lacked some functionality.

"But, in a very short time, our simulator family grew," said Dr. Lisa Seldomridge, director of Graduate and Second Degree Nursing programs. "Now we have a brandnew child manikin, a high-end adult manikin, a birthing manikin and two newborn manikins! All are wireless and tetherless, and much easier to use."

The Sim Center also expanded its physical space by more than a third with a recent renovation. SU now has some 7,500 square feet to provide high-quality clinical simulation and training for students across health care fields, as well as community professionals.

"Our new addition includes a high-tech debriefing space and classroom, which allows us to bring in more students to watch their peers engage in simulations and more external groups," Seldomridge said.

The Sim Center is designed to be a "safe space" for students to practice, make mistakes and master new skills as they learn how to think like health professionals, including nurses and respiratory therapists. "The equipment and supplies that we have to replicate the clinical environment are extraordinary," Seldomridge added.

Dr. Robert Joyner, Respiratory Therapy Program director and associate dean of the Richard A. Henson School of Science and Technology, said interprofessional learning opportunities are another unique feature that have expanded.

"Students from different professions are able to interact side-by-side and on teams because that is how they are going to practice in the real world," he said.

The center is used for research by SU applied health physiology graduate students and faculty. It also has been used by the University of Maryland Eastern Shore's Doctor of Physical Therapy and Physician Assistant programs, as well as SU mathematics students modeling respiratory mechanics.

Community groups that have trained there include Peninsula Regional Medical Center (PRMC) pediatric hospitalists, area school nurses, the Wicomico County Health Department's Drug Action Response Team and the Eastern Shore Collaborative for Interprofessional Education of Health Care Professionals. Other users include Bay Shore Services, Worcester Technical High School, Leadership Maryland, the SU Women's Circle, Girl Scouts of the Chesapeake Bay, Eastern Shore legislators and Delaware Technical Community College's Upward Bound program.

In addition, the Sim Center houses SU's Eastern Shore Faculty Academy and Mentoring Initiative (ES-FAMI), a grantfunded educational program for clinical nurses who want to teach at Salisbury or regional community colleges.

"Being able to film scenarios and debrief on interactions with student actors helps them develop as instructors," said Director Bradley Hauck. New built-in video conferencing technology also better links ES-FAMI to regional partners, including Chesapeake College and Shore Regional Health System. Simulation Coordinator Deanna Schloemer described how SU students use four specialized labs for neonatal, pediatric and adult care, and labor and delivery. They make real-time decisions about injuries, diseases and births. A mental health wing features "standardized patients" or trained actors who also have roles in some manikin simulations. Everything is video recorded for later review with professors.

"Students feel much better prepared for clinical settings," Seldomridge said. "There's a lot of personal attention, feedback and coaching from faculty."

Senior Tressie Windsor used the Sim Center three times just in her first semester in nursing. "You check vitals and give meds, and assess a patient that talks to you," she said.

Alumnus Jeff Geary '17, now employed as a respiratory therapist at PRMC, added: "Not everything you are expected to do as a clinical practitioner can be learned through a textbook. It takes hands-on experience. Doing it on a manikin makes it easier. It's not just knowledge, it's something you can actually perform."

Located near campus at 106 Pine Bluff Road, the Sim Center and its offerings have been supported by over \$3.7 million in grants from the Maryland Hospital Association and the Maryland Higher Education Commission NSP-2 program; a \$1 million gift from the Richard A. Henson Foundation, Inc.; and funding and space provided by the SU Foundation, Inc. and Henson School. Delmarva Veteran Builders led the expansion. For more information visit, www.salisbury.edu/henson/simcenter.

# SweetWater — SweetLife: A Brewery and Marriage Decades in the Making

Jayme E. Block '97, M'99

Nick Nock's '93 Salisbury story started out like many others who came to (then) Salisbury State College in the fall of 1986.

The short commute from Washington, D.C., made it easy to return home when needed. Nick assimilated into the Salisbury and the Ocean City beach community, meeting many great people along the way. One person of interest was Mary Jane (MJ) Steffens, an SU friend who would pop in and out of his life as the years past.

In 1992, MJ moved to Key West for a year with a friend. At that same time, Nick's father got into biking, so he and Nick drove to Miami and biked to Key West, and, of course – you guessed it, saw MJ there. This experience and relationship would serve him well in the years that followed his time at Salisbury.

After graduation, Nick got his start at WZBH (now 93.5 The Beach) as a disk jockey. He was there for a short period, but after listening to himself on the air, he didn't think he was very good, so he began bartending in Ocean City for a while. Nick loved Ocean City and Salisbury, but with a high school friend getting married in Seattle during the OC off season, Nick jumped at the opportunity to make a new start. He and his girlfriend at the time packed up his VW bus and drove cross country to the wedding, visiting a number of Salisbury friends along the way.

Nick knew he wanted to eventually return to the East Coast, but he was not sure where. He drove from Seattle to New Orleans, where he stayed for a short time, realizing that it was not the best place for him. In 1996, he moved to Atlanta because he knew the Olympics would soon flood the city with opportunities. He gave himself two weeks to find a stable place to live and a bartending job, drawing on his experience gained from his days in Ocean City. On the last day of that two-week period, a bartending job came through at Planet

Alumni Gathering at SweetWater Brewing Company in Atlanta on May 31, 2017

Hollywood and a house became available in Homepark, which is in midtown Atlanta.

In January 1997, Nick made a New Year's resolution that he wanted be earn a living through his hobby of brewing beer. Since his time at Salisbury, he had been a homebrewer, learning the craft on rudimentary equipment, but he set a goal of becoming a professional brewer and chose to work at making it a reality. He worked at several brewpubs in the Atlanta area while his girlfriend was a bartender at a local establishment, often visiting her between brewpub jobs during the day. During one of his visits, a guy came in with a six pack of SweetWater, hoping the bar would pick it up. Nick struck up a conversation and asked if they were hiring. He said no, but invited Nick to check the place out. Nick did and started to volunteer at SweetWater. With his bartending job at Planet Hollywood going very well, Nick was able to volunteer for six months until he was offered a full-time job at SweetWater in 1997.

During the time of Nick's volunteering at SweetWater, MJ resurfaced in his life. Living in Boston, she traveled to a sales conference in Atlanta held by her employer Aerotek. There were so many people at the networking events that MJ decided to walk across the street to have a drink at Planet Hollywood, where, you guessed it, once

again she would see Nick. During the ensuing months, they fell in love and MJ transferred to the Atlanta office at Aerotek in September 1999. Nick and MJ married in 2002.

As his relationship with MJ blossomed, so too did his relationship with SweetWater. When Nick first started at SweetWater, there were three owners and Nick – the company's first employee. SweetWater Brewing now has over 150 employees. Nick went from cleaning kegs and loading a small delivery truck with about 12 kegs a day to becoming the head brewer, producing enough beer to load 20 18-wheelers a day, delivering up and down the East Coast. They moved locations to midtown Atlanta to make the brewery more accessible for tours.

SweetWater's annual 420 Festival (held on Earth Day – April 20) is another aspect of the company that has grown beyond what they could have imagined. Initially held as a bar crawl celebrating the environment and the company's unofficial birthday, the 420 Festival was a small event featuring the Atlanta Bugle Corps playing at each stop along the short journey. Music still plays a big part in the celebration, but SweetWater's 420 Festival has expanded to a three-day extravaganza held in Centennial Olympic Park with over 50,000 attendees.

From Salisbury to Seattle to Atlanta and from a 25-barrel brew house to the largest craft brew house in America at 400 barrels, Nick Nock and SweetWater, together, have traveled a long and winding road, but they have stayed the course and SweetWater is now one of the top craft breweries in the country.

The road to the alter was also long and winding for Nick and MJ. Despite time and distance, their Salisbury love story is testament to perseverance and being open to the possibilities that await you in life.

# The Janus Time

By Dr. T. Paul Pfeiffer '75, Professor of Theatre, Emeritus

I came to Salisbury as a freshman in 1971 and have continued to be active in what was then Salisbury State Theatre until I joined the faculty in 1980. Here I began my journey through a life in academic theatre. Thirty-seven years later (46 in all) I approach the gateway to a new life outside of academia - redolent with fresh opportunities and challenging choices. The old question echoes anew: "What do you want to be when you grow up?" Approaching what I had long referred to as, "The Golden Time I Look For" (borrowing from Shakespeare), I pause at the threshold to consider what is before and, more specifically, what is behind. Now, is the "Janus Time."

Janus was the ancient Roman god of beginnings, transitions, duality, passages and endings. He is usually depicted as having two faces, since he looks to the future and to the past. I have been reminded of Janus as I have gone through the emotional and intellectual process of readying myself for bidding farewell to my beloved Alma Mater. When one has spent a lifetime in a single institution of learning (which is very rare now) and has dedicated so much of oneself to nurturing the development of a program, some remorse is to be expected - not at the thought of leaving so much as at the prospect of what has been left yet to do. Yet there will always be those tasks uncompleted; those goals not quite met; and yet there remain on the balance side an enormity of goals wellmet or tasks triumphantly accomplished. These will be the life's work of the generation to follow. They must take up the torch - just as I had done so long ago.

When I first arrived at Salisbury State College, the dorms were separated by gender and the rules of

co-mingling were strictly enforced. Curfews – for women, at least – were watchfully kept and infringement seriously punished. Within my four years as a student, co-ed dorms and 24-hour visitation became the norm. The Cultural Revolution of the 1960s had finally reached Salisbury.

But with greater freedoms came greater responsibilities, and students were increasingly held to be responsible for their actions. There was no hand-holding or coddling – now regarded as so critical to undergraduate success. As part of another "Janus Time," students on the threshold of adulthood were given the freedom to choose for themselves, but with the caveat that they also accept the consequences of their choices – as adults. I will always be grateful for the power of those lessons on the reality of my adult life.

I was hired in 1980 after the sudden death of my mentor and teacher, Dr. Leland (Lee) Starnes. I began as an assistant instructor responsible for our technical theatre needs and for those of all incoming events, as this was before the creations of Events Services. Theatre was, at that time, still a part of the Communication Arts Program, and so I also taught Fundamentals of Communication. I also undertook the costume design and those courses, as we had no such position at the time, and began working on my master's degree at College Park – commuting

for classes all the while holding down my full-time job at Salisbury. Eventually, I began to direct and to teach performance classes and Theatre History. These ultimately became the content of my professional life – Acting and History – and I have reveled in all of it

I had, in effect, fulfilled my goal of furthering Lee's work. When he had once asked me what I wanted to do with my life, I replied, "I want to do what you are doing." His response was, "Then get out there and get some letters after your name." I did. And I have carried on his work and feel proud that I have succeeded not only in continuing our theatre, but in solidifying our reputation and enlarging our impact and our artistic contribution to the campus and the community.

Meantime, our little Salisbury State College was growing and meeting the challenges of those times with aplomb – all thanks to the many dedicated professionals in administration and in instruction who quietly pushed forward – as is expected of us all. Every human institution is flawed. Although each must be guided in growth, yet it must evolve naturally. Salisbury has changed immensely in the last half-century – as it inevitably must and as it ought to have done.

The single most dramatic change – which has impacted the most – and that which has led to so many related shifts in practice as well as philosophy

has been the creation of Salisbury University and the four endowed schools of study. As one who knew the institution well before this great shift, however, I cannot stifle a moment of lament at the loss of the simplicity and familiarity of that smaller and more intimate haven affectionately called "Salisbury."

Yet, the creation of the University has led to immense growth and immeasurably valuable experiences for our students. I feel envy for our students now for the incredible opportunities afforded them by such programs as the Honors College and the Study Abroad Program. Surely, the newer facilities also create the impression, at least, of greater educational opportunities - at least enjoyed under better circumstances.

The faculty, too, have become much more global and diversified, and as a result, Salisbury University has become more renowned and more competitive in what has become the business of American higher education. I intend no criticism but accept this as the way of our present world. Higher education is now much more clearly the realm of politics. We have become, of necessity, more global, more diverse and more concerned with issues beyond our own red brick walls. Our survival is reliant upon a world-wide vision. The insulated and protected climate of "The Ivory Tower" is no longer possible – nor perhaps desirable - in the larger interests of

creating global citizens and not simply majors.

As our old "Salisbury" has continued to evolve and to expand, it has also diligently retained its dedication to its students and respect for its faculty. For this, I credit the leadership of its current president, "Dr. Janet," who has steadfastly nudged, charmed and otherwise shoved the Maryland legislature to support that vision of old "Salisbury" as a truly global and educationally competitive institution with its foundations in tradition, but its feet now firmly planted in the sands of our ever-shifting world.

I am very proud to have played some small part in the evolution of our Alma Mater. Looking back, I have had a very good run. I feel a strong sense of fulfillment and pride in those accomplishments. Old "Salisbury" has been very good to me – and I have striven to repay my debt. My hope is that my students and colleagues will consider that debt

Mine has been a Life wellspent. Now, at "Janus Time" I look back with pride - and look forward with hope. And I am grateful for the privilege of both.

Dr. T. Paul Pfeiffer retired in spring 2017 following a 37-year career with Salisbury University and its theatre program.

# "Thanks, and Thanks and ever Thanks."

- Shakespeare, of course!

# A Lasting Legacy Through Scholarship

By Michelle Pryor '13

Danny Landsman was one of a kind. A Salisbury University student who was compassionate, motivated and dedicated to success in all areas of his life. He was extremely active on campus, passionate about helping others and creating better experiences for those around him. After a sudden collapse in Maggs Gym the winter of his junior year, Danny's time with those around him was cut short.

Fifteen years after his untimely death, Jerry Daniel Landsman "Danny" is still remembered as a Salisbury University student leader through his memorial scholarship the Dan Landsman Outstanding Student Leader Award. This award was created as a memorial to Danny Landsman and a way to recognize students who impact student life through their varied commitments and activities.

According to Heather Holmes, director for the SU Center for Student Achievement and friend of the Landsman family, the scholarship is impactful because it embodies all of the characteristics of an outstanding student-leader. It emphasizes the qualities that were important to Danny – scholarship, leadership, mentorship and community. "I often share his words (How to Get a 4.0) with students in the pursuit of academic success," Heather shared. "I am so proud to have known and worked with Danny."

When Danny arrived at SU, he was an honors graduate of Boonsboro High School and was active on the cross country, wrestling and baseball teams. Before his death, Danny was in the business administration Honors program. His advice, "How to Get a 4.0," served him

well in this regard. He was co-director of Saferide, co-president of the Fishing Club, a member of Omicron Delta Kappa honor society and involved in several other student groups. His legacy is carried on through the selfless, tireless leadership of these organizations.

Funds for the award are raised each year through the annual JDL 5K commemorative run held by Saferide. Heather said: "I participate in the JDL Run each year to reconnect with alumni and the Landsman family, and to share Danny's vision with current students." Proving the lasting impact of his time at Salisbury, Heather shared, "Danny still inspires me to engage in all aspects of life."

Danny's Advice for Academic Success: How to Get a 4.0

- 1. Read the Syllabus
- 2. Don't Skip Class
- 3. Get the Easy Points
- 4. Focus, Concentrate, Relax
- 5. Use Reasoning
- 6. Prioritize (See the Big Picture)
- 7. Time Management
- 8. Participate

This year, the award was presented to junior Allen Reynolds, who has served on the Saferide executive board as a general assistant as well as vice president of personnel. "I am extremely thankful to be the recipient of the scholarship," Allen said. "The Danny Landsman Memorial Scholarship eases a potentially significant burden." Allen also has a special connection with the Landsman family through his paternal grandfather, who was Danny's elementary school principal. He said his grandfather often speaks of how the Landsman family are very kind-hearted and active in the community, something they shared and passed on to Danny.

Danny's father Jerry Landsman, shared: "[Danny's] proudest achievement was his involvement with the Saferide program ... When we [Jerry and his wife Cathy] discussed ways to memorialize Danny, the creation of the Saferide scholarship was the most logical choice. We have been pleased that the organization continues to operate the JDL Run and to continue his legacy. We have not, however, been surprised, as SU has always been warm, welcoming and supportive to our family and friends. It will always be a special place for us."

Fifteen years may have passed, but through this award supported by friends, family, alumni and current students, Danny is remembered and continues to create better experiences for Salisbury students.

For more information on how to support the Danny Landsman Memorial Award or various other scholarships at Salisbury University, please contact the SU Foundation at 410-543-6175.

# Future (and Current) Business Leaders in NYC

By Luke Smith '17

This spring, I attended the annual Financial Management Association (FMA) trip to New York City, along with 26 of my peers, Dr. Ani Mathers, Dr. Danny Ervin and Perdue School Dean Christy Weer. The FMA, aided by SU alumni, arranged several incredible meetings. This was an opportunity that will have a lasting impact on each student who attended. While it was stunning to see the huge buildings and glitzy high-rise views, and to experience NYC, these things pale in comparison to the vast knowledge and influential advice that we received from the alumni and executives we met.

The first morning, we split into two groups. One group visited Fox Television to speak with SU alumnus Joe Dorrego '96, CFO of Fox Television, and the other group met alumnus Sean Carmody '09, vice president in Capital Markets at Maxim Group, LLC. Peers who went to Fox said it was an amazing experience, and I can say the same of my experience at Maxim Group. Carmody greeted us and gave a brief tour of the offices, located in the Chrysler Building, followed by a meeting with most of the company's executive team.

One piece of advice that seemed integral to the success of those we spoke to was to be career diverse and adapt to change. Clifford Teller, executive managing director of Investment Banking, advised us that, "You have to be evolving constantly." This was echoed in Carmody's path, as he started in investment banking, spent time in foreign exchange, then moved to capital market sales at Maxim. This seemed like very useful advice and it stuck with me: Don't get married to any one path or you are limiting yourself before you start. If you find opportunities in other areas, you need to take them and adapt.

In the afternoon, we had the unique experience of visiting the floor of the New York Stock Exchange for the closing bell. The floor is not open to the public, and our visit was arranged by SU alumnus

Ron McGann '88, who also hosted us at J.P. Morgan the next afternoon.

The second day, one group visited SU alumnus John Fitzgerald '95 at Société Générale while my group toured Bloomberg. Later, both groups rendezvoused at J.P. Morgan Private Bank to meet McGann. He arranged for us to hear from several employees of the investment bank, including a senior equity researcher often seen on CNBC and a recruiter who gave us valuable insight into what J.P. Morgan looks for in the hiring process.

McGann also shared his story and provided advice (such as the importance of aggressively following-up) and motivation. One message he shared was, "You can get there from here," a motivation for those students who feel like coming from a relatively smaller school limits their job options.

It was an inspiring trip that left many students with a new outlook on just how far hard work can get you. The only caveat, in McGann's words, is, "You need to know where you're going."

"My colleagues and I very much enjoyed our day hosting students from Salisbury University. Every year, students join us for a tour of

the New York Stock Exchange and visit with us at J.P. Morgan headquarters, where they can ask questions and participate in an analyst panel. As a Perdue School Executive Advisory Council member, it is a privilege to spend time with young people who are enthusiastic about learning and who want to engage with the world on their own terms. There is nothing more gratifying than being able to encourage and guide them as they explore their own paths."

- Ron McGann '88 Vice Chairman J.P. Morgan Private Bank

# The McGlinchey Legacy

## **Golfing with Purpose**

By Jayme E. Block '97 & M'99
Director of Alumni Relations and Gift Development

During spring 1996, former SU football and wrestling coach Mike McGlinchey needed a computer and some other technology to better his quality of life. At that point, Coach McGlinchey was steadily battling the effects that amyotrophic lateral sclerosis (ALS) was having on his body. A gifted communicator throughout his life, Coach McGlinchey was able to get the most out of everyone who played for him or whom he taught in the classroom. He had that gift, and for a small period of the time, the gift was gone.

(From left) Tony Hartman, Dave Spradlin, Joe Kelly and Ed Borda pose with Baltimore Colt Legend Johanny United at the Third Annual Mike McGlinchey Golf Tournament Reach Club, 1998

He had not been able to speak or use his hands for some time, so this new technology that the McGlinchey's found at the University of Pittsburgh gave Mike the ability to write using his feet. Finally, the people who he was always there for had the opportunity to return the favor and provide the resources he needed to purchase this equipment. Little did anyone know that the resulting golf gathering to help their coach, mentor and friend obtain the ability to communicate and actually write his philosophy on life would lead to a very successful fundraiser that would continue for the next 22 years and beyond.

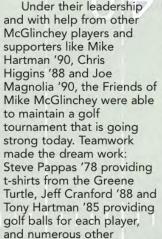

Over the years, this golf event has gone through a few names since its inception in 1996. For the first year, it had no name; it then changed to the Mike McGlinchey Memorial Golf Tournament after the passing of the beloved coach; and now it is the Friends of Sea Gull Football Golf Tournament. No matter what the name of the tournament, the reason to come together is always the same, to honor Mike McGlinchey.

The concept for the tournament was created by SU alumnus and football great Johnny Watson '75. Later others stepped forward to help shape the event, including SU pillars Pat Lamboni '78 and Robb Disbennett '86, along with Mike's wife Marylane McGlinchey '87, and SU alumni Dave Kirchoff '79, Frank Oliver '87, Tim Jones '95, Mitchell David '97 and Bobby Vermillion '83, who supplies a golf getaway for a lucky raffle winner. Gerry McGinty, the father of Salisbury wrestler and SU Hall of Famer Gerry McGinty '82, was the conduit to the wrestling community that substantially supported the golf tournament right from the start. Year after year, the golf tournament grew in stature and became an event in July that could not be missed. Over the past 10 years, the tournament has grown to average over 200 golfers annually!

#### Mike McGlinchey Memorial Endowment

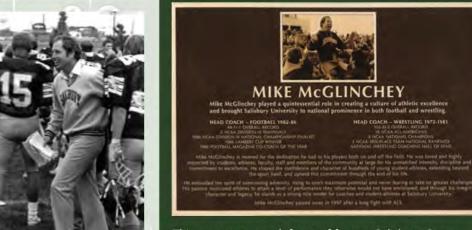

By Tony Hartman '85

donations all in the name of Mike McGlinchey. SU alumnus and Atlanta Falcons Head Coach Dan Quinn '94 donates a football package, which includes four game tickets, airfare and hotel accommodations for the winner of the reverse raffle held at the reception.

Although Coach McGlinchey would be hesitant to have a golf tournament named in his honor, he would love seeing the teamwork displayed by his former football players, wrestlers and students to raise funds to battle ALS and help the Wicomico Youth Wrestling Program as well as the football and baseball programs at Salisbury University. Over \$100,000 has been donated to the Robert Packard Center for ALS research in hopes of finding a cure for this terrible disease.

In 2017, the Mike McGlinchey Memorial endowment was established to enable aspiring football coaches to get the professional development that they need to succeed at the next level. This is a fitting tribute for a coach, teacher and friend who provided mentorship for so many.

This past year, a task force of former Salisbury State football players, wrestlers and coaches established the Mike McGlinchey Memorial Endowment at Salisbury University, culminating with the unveiling of a memorial plague in the new Sea Gull Stadium.

Kicked off by former SU quarterback and philanthropist Bob Moyle '77, the Mike McGlinchey Memorial Endowment provides funding to help develop young football coaches at SU as they strive to get to the next level in the coaching profession.

Mike McGlinchey established an early foundation of excellence and national prominence in both football and wrestling at then, Salisbury State College.

wrestling at then, Salisbury State College.

He was loved and highly respected by students, athletes, faculty and members of the community at large for his unmatched intensity, discipline and commitment to excellence. He shaped the confidence and character of hundreds of young student-athletes beyond the sport itself and upheld this commitment through the end of his life.

Mike McGlinchey embodied the spirit of overcoming adversity, rising to your maximum potential and never

fearing to take on the greater challenge. He pushed his players to attain a level of performance that they would not have otherwise envisioned and he continues to stand as a strong role model for studentathletes at Salisbury University.

We lost Coach McGlinchey in 1997, at a young age and after a long fight with ALS. His memory and legacy are branded into the success and history of this great institution.

We hope you will consider giving today and help carry on a great legacy at SU. Please visit SalisburyU.givecorps.com under the Maroon & Gold Club section to make a

secure online donation or contact Jayme Block at jeblock@salisbury.edu for more information.

# Looking Back at The Holly Leaf

By Margaret Long '16, M'18

Recently, the Salisbury University Alumni Office received a letter from Levin Heath, an alum who attended the State Teachers College from 1947 to 1950. Heath's letter details memories made while attending the College, many of which were recorded in the school's newspaper, The Holly Leaf. Glimpses into the past that we uncovered are shared here.

Articles detail times such as when Heath, who was the Student Government Association's president from 1949 to 1950. attended the groundbreaking ceremony of the Men's Dormitory (now Wicomico Hall) and even introduced President Blackwell. Heath's letter also mentions the opening of the snack bar in the basement of Holloway Hall, the soccer team's prowess and the shenanigans students partook in.

A picture on the front page of the October 12, 1950, edition of The Holly Leaf portrays Dr. Blackwell pouring the first soda from the new snack bar. The article that follows details that the college had discussed adding a snack bar for quite some time and that Mr. Fleming, an economics professor, had a great hand in the planning stages. It is also mentioned that the majority of the snack bar was paid for by the State Department of Education, something that Heath mentions in his letter. The only items not paid for by the State

Levin Heath crowning May Queen Margaret Phillips

Department of Education were the grill and the milkshake machine.

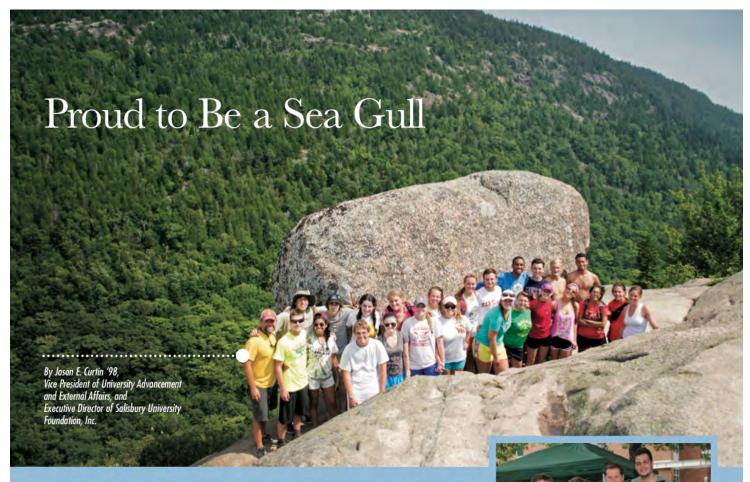

Heath mentions that during his time at Salisbury State Teachers College, the soccer team excelled under the coaching of Benn Magas. While Heath was on the team during all four years he attended the college, the soccer season of 1947 was a rather impressive one since the team only lost once to the University of Maryland. The seasons from 1948 to 1950 had similar statistics. albeit with a couple of tied games, but the years 1948 and 1950 were also met with the only loss to the University of Maryland. The Holly Leaf covers these losses, but always mentions hope for the next season.

The November 19, 1948, edition of The Holly Leaf includes a section titled "Through the Keyhole," written by someone under the pseudonym "Snoopy." The section detailed campus gossip and student shenanigans. Snoopy's article comically mentioned relationships on campus and even made a sly comment on "midnight raiders" in the girls dormitory. Coincidentally, Heath briefly mentioned in his letter a glass window between the girls and boys dormitories in Holloway Hall that was constantly broken due to these midnight raids.

Other similar articles depicting what life was like on our campus over 50 years ago can be found throughout The Holly Leaf. Anyone wishing to investigate the University's history will find it worthwhile to look into The Holly Leaf, whether it be for academic reasons or personal perusing.

Photographs and other documents from the University's past can be found in the University Archives at the Nabb Research Center. Digitized copies of The Holly Leaf can be found online at:

https://mdsoar.org/handle/11603/3300

I am honored to have been asked by President Janet Dudley-Eshbach to serve Salisbury University as the vice president for advancement and external affairs and the executive director of the SU Foundation, Inc.

Salisbury has been part of nearly half of my 40 years on this earth: I earned a communication arts degree here; I've spent 14 years (and counting!) on staff here; I've met lifelong friends, and my wife, here. Perhaps one day, I'll even be a Sea Gull parent.

During this time, I've proudly watched the campus grow in stature and reputation, in student enrollment, and in size — both in terms of land acreage and the square footage of facilities. While yes, we are a state-supported public institution and the President advocates tirelessly for those funds, we only truly are able to achieve this growth because of private philanthropy and alumni support.

People often ask what my job entails. I've learned from my mentors that it's both "friend-raising" AND fundraising. I work alongside dedicated colleagues to share campus news, plan and promote events, help recruit students, engage alumni and community members, garner financial support, and invest those resources for the

ultimate benefit of this great University for generations to come.

We've seen in recent years the remarkable construction of Conway Hall, Perdue Hall, Sea Gull Square, Sea Gull Stadium and the Guerrieri Academic Commons, just to name a few highlights. In the near future, we'll be looking to establish a College of Health and Human Services, build support for a Fine and Performing Arts Center and a new Fieldhouse, and grow our Honors College, as well as endowments for scholarships and programs. All of this is very exciting.

But the best part of my job is visiting with alumni on campus and on the road. I'm amazed at what all of you are doing in your post-Salisbury lives. I've traveled from Maine to Florida, New York to California, and each alumnus I meet fascinates me. Your stories of success all have a similar thread – they start with your experience at SU.

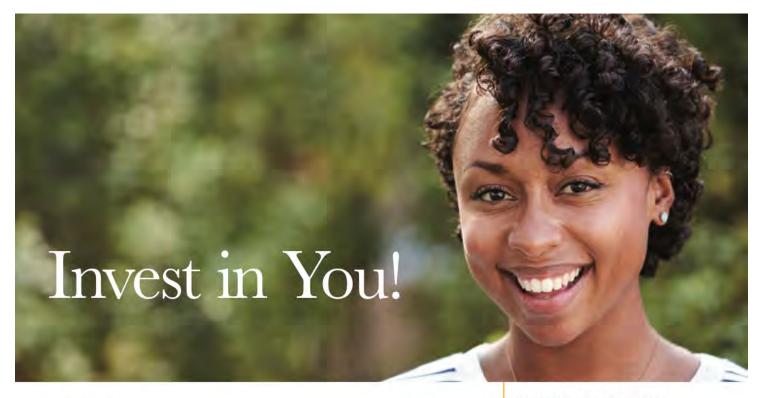

The other facet of my job that I love – and this is true for many faculty and staff – is being around our students. I have taught as adjunct faculty for the Communications Arts Department, advised student organizations and led a new student outdoor orientation program for over a decade. Our students invigorate me. They are passionate, creative and

entrepreneurial, and I feel good about the next generation of leaders and their impact on the world.

I look forward to the continued relationships and welcome future connections with you, as alumni and supporters of our Alma Mater. If you see me at an event, come say hello. I will be sure to do the same. Or even better yet, if you've not been back to campus in some time, please do so ... you'll be amazed at what you see. I think you'll be proud, like I am, to say you are a Sea Gull.

Hello Sea Gulls,

We understand that many of you are considering ways to improve yourself and considering what is the best option for investing time, energy and money. Of course, there is no better investment than yourself!

A graduate degree from Salisbury University provides increased opportunity and experience at a great price. As a proud Sea Gull, you "get" the value of an SU degree. Add to this value by pursuing a graduate degree from your Alma Mater. If you have already completed a graduate degree at SU, we hope that you agree it has been a great decision for you and has provided you a chance to advance your personal and professional goals. If you haven't, then welcome back!

Salisbury University has over 20 options for pursing education and training beyond the baccalaureate degree. Listed on the right are all of the graduate degree and certificate programs.

#### There are various modes of delivery: on-campus • hybrid • online Let us help meet your needs.

Graduate Studies at Salisbury University

# The Bells of SU Arrive

The bells in Salisbury University's 48-bell Brown and Church Carillon were hung this summer at the Patricia R. Guerrieri Academic Commons.

The carillon was funded through a \$2.4 million gift from Delaware entrepreneur William Church in memory of his long-time partner, Samuel Brown. Both have been supporters of SU for many years. The two largest bells, weighing approximately 2 tons each, are inscribed with their names.

The first of the bells hung were made by London's Whitechapel Bell Foundry, which also cast the original Liberty Bell. The company closed earlier this year after more than five centuries in business.

The remaining 46 bells were cast by Meeks, Watson & Co. in Georgetown, OH, the largest producer of carillon bells in the nation. Installation is expected to take up to three weeks.

According to the Guild of Carillonneurs in North America, a traditional carillon consists of at least two octaves of bells that can be played musically with a touch-sensitive keyboard. (Smaller groupings of bells are referred to as 'peals" or "chimes," depending on number and ringing method.)

By this definition, the Brown and Church Carillon, with four octaves, is the first traditional carillon on the Eastern Shore - and one of fewer than 200 in the U.S.

#### BY THE NUMBERS

Total number of tiers in the bell frame

Total number of octaves represented by the carillon

**7.125"** Diameter of smallest bell

16.25 lbs. Weight of smallest bell

Height of bell tower, the tallest structure on campus and believed to be the tallest enclosed structure in Wicomico County

4 tons Combined weight of the two largest bells

27,655 lbs.
Total weight of bells
(nearly 14 tons)

Working on the NSF grant is a really big deal. It's cool because it's actual real-world research. We are discovering real things that real people are going to use and that are hopefully going to solve real-world problems.

They had data, but the data we are giving them is better. . . . We're showing them how to use GIS techniques so they can incorporate the information we provided to come up with solutions. It helps them in the long term by having a more accurate map. When they are running their models of where fish live they now have a better understanding of where the deep parts of the lake are and where the shallow parts are.

From that, they can narrow it down to where fish are going to be.

By digitizing the shoreline, we got the islands as well. Before the project, there were 95 known islands, and after digitizing the shoreline, there were 900 islands. There aren't new islands; we just have better data.

Dr. Stuart Hamilton of SU's Geography and Geosciences Department received a \$1.8 million National Science Foundation (NSF) grant to support geospatial data collection and analysis for fishery institutes around Lake Victoria in East Africa. Hamilton is responsible for designing environmental suitability models for various fish species at different stages in their life cycles. He believes the project will contribute to improved food and income security in East African nations that rely on the natural capital

During spring break, Hamilton travelled to Africa with seniors Noah Krach and Hannah Sweet, who helped them prepare and teach Open Source GIS workshops in three institutes: National Fisheries Resources Research Institute in

provided by Lake Victoria.

Jinja, Uganda; Kenya Marine and Fisheries Research Institute in Kisumu, Kenya; and Tanzania Fisheries Research Institute in Mwanza, Tanzania. This amazing opportunity was life-

Africa Photo Credit: Dr. Daniel Harris

changing for these two geography majors.

It was incredible! I've always wanted to travel ... and it was an opportunity that I've always wanted to have. ... We were teaching the workers of the fisheries some of the Open Source GIS methods, and it was really enjoyable to see these people passionate about it. They are able to do more research now and help us with the project as well.

When I came to SU, I didn't think I'd get an internship where I'd get to go to Africa and actually do real work. With my geography major, I've always wanted to do a real project and this really opened my eyes and gave me a great experience. . . . It has helped me realize that I do want to continue to do

GIS, and I want to get into cartography particularly. Doing this project has helped me a lot with figuring this out.

- Hannah Sweet '17

Noah Krach '17

# THE PRESIDENT'S MEDAL

When Irina Bokova, director-general of the United Nations Educational, Scientific and Cultural Organization (UNESCO), visited Salisbury University this spring, she became the fourth recipient of SU's President's Medal for leadership and service.

Created in 2014, the Medal is one of the University's highest honors, conferred upon speakers and guests who have made significant contributions in politics and culture, serving as models of civic engagement for SU's students and others. In addition to Bokova, awardees have included a president, two prime ministers from abroad and the chair of Maryland's powerful House of Delegates Appropriations Committee.

The inaugural medal was bestowed upon Maryland Delegate and SU alumnus Norman H. Conway (B.A. '65, M.Ed. '72) during SU's Fall Commencement in 2014, shortly before his retirement from politics after 28 years with the House of Delegates. Conway began his political career as a 13-year member of the Salisbury City Council before being elected to the House in 1986. He served as chair of the House Capital Budget Subcommittee and Appropriations Committee, advocating for funding for projects on the Eastern Shore, including SU. One of those projects, SU's Teacher Education and Technology Center, was renamed Conway Hall in his honor last year.

All other recipients have been guest speakers in SU's One Person Can Make a Difference lecture series, sponsored by the Bosserman Center for Conflict Resolution. The first, Dr. Lobang Sangay, came to the University on the eve of his reelection as sikyong (prime minister) of Tibet and political successor to His Holiness the Dalai Lama to discuss "Democracy and the Third Way." During the talk, he advocated for a peaceful, non-violent solution for Tibet to regain national autonomy within the Chinese constitution, similar to systems in place in Hong Kong and Macau.

In 2016, the medal went to former Democratic Republic of East Timor (Timor-Leste) President and Prime Minister José Ramos-Horta. A founder of the Revolutionary Front for an Independent East Timor, he shared the Nobel Peace Prize with Roman Catholic Priest Carlos Belo, also of Timor-Leste, in 1996 for their non-violent efforts to end the Indonesian occupation of the country. A decade later, he became the nation's second prime minister, just four years after it gained

independence from Portugal. He served as president from 2007-2012. Today he is a special representative of the United Nations.

Bokova, the most recent President's Medal recipient, discussed "Preventing Violent Extremism in the 21st Century: Fostering a New Generation of Global Citizens" at SU. Becoming first female and first southeastern European to head UNESCO in 2009, she also served two terms as a member of Bulgaria's National Parliament. Through UNESCO, she advocates for

gender equality, improved education, preventing terrorism funding, enforcing the protection of intellectual property, and opposing racism and anti-Semitism.

These four President's Medal recipients have impacted the lives of millions — including SU's students. Whether studying in the buildings Conway helped fund or taking inspiration from the deeds of world leaders, the message remains the same: One person really can make a difference.

## Dear Fellow Alumni,

It's that time a year again! Students will soon be back on campus, bustling around, getting acclimated to their new classes and daily routines. I remember many years ago when I was that student finding my way across Salisbury's campus. I was

amazed by the four benefactors whose endowments laid the foundation for what Salisbury has become. But, the success of the University is so much more than that. SU would be no where without all the dedicated and supportive alumni.

Every day, alumni like you serve the University and students in the classrooms, as donors, mentors, employers and political activists, among many others ways. My responsibility is to make sure that your university

also looks out for and serves the needs of our alumni. One of the ways we look to accomplish this is through a new initiative to expand our Alumni Scholarship Fund, which will allow us to offer the opportunity for a full scholarship for children of our esteemed alumni.

Over the next few years, we'll be taking actions to bolster our fund to allow us to provide this revamped scholarship opportunity. I know this is a lofty goal, but it is my belief that if you don't

reach for the stars, you'll never reach them. We believe that your children (future Sea Gulls) deserve an opportunity to fly free without the weight and burden of student loans.

How can you help? You can designate your future donations to the Alumni Scholarship Fund.

Homecoming and Family Weekend is Friday-Sunday, October 6-8, this year. The Alumni Office has been diligently working throughout the summer and are in the process of putting the final touches on the major alumni events. After great success last year, the Alumni Association will once again offer the Pre-Game Barbecue with a reduced rate to all alumni who preregister! This continues to be a growing tradition during Homecoming, so I encourage you to preregister and attend this tremendous event. We will be celebrating reunion years of those who graduated in years ending in 2s and 7s, but everyone is invited. Please visit www.solisbury.edu/homecoming for a full list of activities and events.

Thank you to all those who made a gift during the 2017 fiscal year. Your continued financial support of all things Salisbury has directly helped our students in their pursuit of an outstanding collegiate experience. As mentioned before, making a gift, becoming a mentor or having students at your place of business to get a real sense of the workplace are all ways we shape our legacy as alumni while making an impact on the current and future students at Salisbury University.

Respectfully,

Julius M. Jones Jr. '06, M'09 Alumni Association Board President

#### Young Alumni Achievement Award

At SU's 91st-year Fall Commencement, the SU Alumni Association bestowed Jennifer Truitt-Lewis, who earned her B.A. in elementary education from SU in 2004, with the Young Alumni Achievement Award.

After graduating from Salisbury, she began her teaching career in Wicomico County, going on to earn an M.Ed. in education law from Park University in 2008 and a master's in education administration from Arizona State University in 2014 - the second while battling stage 3A breast cancer. Today, she is principal of Colonel Johnston Elementary School in Fort Huachuca, AZ, and an adjunct faculty member at Northern New Mexico College. She remains a passionate advocate for breast cancer survivors through her work with the American Cancer Society and Susan G. Komen Arizona.

#### **ALUMNI** BENEFIT!

As an alumnus, you receive alumni benefits with GEICO insurance. GEICO gives our alumni many types of insurance discounts and supports SU programming such as our Senior Celebration that we host each spring.

#### New Alumni Website!

The SU alumni website has returned to salisbury.edu in an effort to realign our offerings and information with the great things going on at the University. With an improved giving page, event registration page and up-to-date Twitter feed, we are confident you will enjoy the new site more than ever! Visit us and try it for yourself. www.salisbury.edu/alumni

# Alumni Spotlight: Joe Hart '79 (Sociology)

I have been director of Spiritual Support Services at Greater Baltimore Medical Center (GBMC) since 1996 as well as the executive director of the GBMC Center for Spiritual Support Training since 2010, providing spiritual support and emotional reassurance to patients, families and staff. Presently, I also clinically supervise seminary /graduate students from a variety of higher education institutions.

My B.A. in sociology with an emphasis in healthcare and gerontology that I earned in 1979 has served me well in my present work where much of my hospital chaplaincy focuses on the elderly. I am also co-chair of the hospital Ethics Committee, which enables me to easily navigate my responsibilities through my knowledge that began at Salisbury. The basis for my present hospital work I attribute to my studies guided by my professors at SU, in particular Dr. Charles Cipolla and Dr. Phillip Bosserman. Their guidance and wisdom have guided and molded my focus and desire to have my life in ministry be lived in the care of others, in particular the sick and vulnerable.

Following my studies at Salisbury, I went on to my graduate work in theology at St. Mary's Seminary and University in Baltimore, America's first seminary, founded in 1791. Upon graduation with a Bachelor of Sacred Theology and a Master of Divinity in 1983, I served a variety of churches in Baltimore, where in 1994, I

was hired as the first chaplain and coordinator of volunteers for the Hospice of Baltimore, now Gilchrist Services, Maryland's largest hospice organization. Two years later, I was hired to my present position at GBMC.

Over the past year, I had the opportunity to have conversations with many of my colleagues, but one that I had with Justin Hamilton '08 in between visiting intensive care patients sent me down a path that I did not expect. During our conversation, I asked Justin where he had done his undergraduate studies. As the conversation continued, Justin told his story and his love for the Respiratory Therapy Program at Salisbury University. He shared: "I feel I got to know a lot of people while at SU who have become lifetime friends, and I learned at a higher level because of the smaller, warmer class sizes and inviting environment."

After this conversation, I wondered who else at GBMC might also have studied at Salisbury. As it turns out, there are eight nurses who presently work with patients and are in nursing leadership who are graduates from the SU Nursing Program. Among the nurses is Kim Kalista Vohrer '03, who is the manager of Unit 38 at GBMC. Overseeing the Progressive Care Unit in her leadership role, Kim impacts nurses in honing their skills and

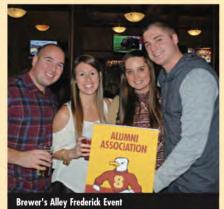

interactions with patients, keeping her staff current with ever-changing medical technology to improve the patient experience. When I asked Kim about her experience at SU she said: "The clinical knowledge that I gained while at SU created the foundation that has supported my career, but the program was more than just knowledge. I developed a bond with the students who graduated in my class. We worked hard, we supported one another, and we had a sense of discipline. We knew that it was not a responsible choice to go to the Monkey Barrel the night before a 7 a.m. clinical where we had to care for patients."

I am proud of my work as a priest in the Episcopal Diocese of Maryland as I serve as the chaplain and director of spiritual support services at GBMC as well of being an alumnus of Salisbury University. SU gave me and my alumni colleagues a foundation of knowledge that has served us well no matter what situation comes our way.

# Alumni Athletic Reunions: Gulls Fly Home

# New Alumni Board Members

The Salisbury University Alumni Association has welcomed two communication arts graduates to its board of directors: Katy Hopkins of Millsboro, DE, and Dr. Monica Moody Moore of Silver Spring, MD.

Hopkins earned her B.A., and a minor in conflict analysis and dispute resolution, in 2011. She returned for her M.Ed. in post-secondary education in 2013. Currently, she is the director of marketing and recruitment for Sposato Landscape and Sposato Family Vineyards.

No stranger to alumni relations, Hopkins worked for six years as an undergraduate student and graduate assistant in SU's Alumni Office, helping to plan and organize events including Homecoming and reunions. She also coordinated weddings for SU Event Services. She is a former captain and assistant coach for the SU field hockey team and, in the

community, has been a longtime coach for the Shore Byrds Field Hockey Club Team and is the assistant field hockey coach at Worcester Prep in Berlin.

Moore earned her B.A. from SU in 1992, later receiving her M.Ed. from the University of Maryland College Park and Ed.D. from the University of Pennsylvania. She is associate dean of academic programs at Johns Hopkins Carey Business School and the founder of High Aspirations, an educational and management consulting service.

SU's Multicultural Student Services Office has welcomed Moore for numerous keynote lectures and seminars for students. She has given leadership and coaching workshops across the U.S., and is an adjunct lecturer. Previously, she served in senior leadership positions at the College of Notre Dame of Maryland, Georgetown University, American University and the University of Maryland College Park. A member of Alpha Kappa Alpha sorority, and Jack and Jill of America, she is the author of Take Me to the Happy Place. She and her husband have two children.

# One Day. Every Sea Gull. Everywhere. #GullsGive24

By Michelle Pryor '13, Annual Giving Coordinator

Giving Days have been popping up on campuses across the country for the last few years. It is a day where a University can celebrate philanthropy and educate students, alumni, faculty and friends about giving back to their institution. For Salisbury University, it was a step into the unknown and an opportunity to generate excitement about giving back. Luckily for SU, generous donors Wayne '89 and Melissa Judkins '89 created a challenge gift to help obtain new donors to SU. With high hopes on April 4, 2017, Salisbury alumni, students, staff, parents and friends joined together for SU's inaugural Giving Day Challenge, GullsGive24.

These of part of gift on Going Dog.

GullsGive24 was a 24-hour, midnight-to-midnight challenge encouraging all Salisbury University supporters to financially give back to current students – in any amount to any area of campus. All student gifts were matched 2:1 to the same area of campus by the Judkins, and gifts from alumni and friends were matched 1:1 to the donor's scholarship. Thanks to several other supporters, major challenge gifts were unlocked every 50 donors toward the 200-donor goal.

Several exciting events were planned for the day, including free coffee for Giving Day donors sponsored by alumni-owned Rise Up Coffee and an appearance at the Salisbury University versus the Shorebirds baseball exhibition game. Hourly raffles and social media challenges involved supporters online and encouraged them to

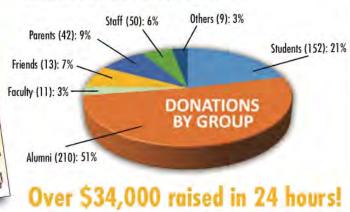

share Giving Day information with friends.

When midnight marked the end of GullsGive24, 487 donors had given over \$34,000 to help various programs and organizations across SU's campus! Donors also unlocked \$14,000 worth of challenge gifts and earned over \$30,000 worth of matching gifts from our alumni donors.

Thank you to all of those who helped make SU's inaugural Giving Day such a success. So many deserving organizations, academic departments and student groups were shown the love by Sea Gulls and GullsGive24 demonstrated how the value of one gift – combined with others – can really make a difference!

If you missed the inaugural giving day, don't worry because it will be back in 2018

on April 3.

# Call for Nominations: Faculty Appreciation Awards

Was there a faculty member who was influential in making a positive impression on you while at SU or one whose teachings have further enriched your professional or personal life? Nominations are being taken for Faculty Appreciation Awards to be presented by the Salisbury University Alumni Association at the December 2017 Commencement ceremony. The Alumni Association will honor one faculty member from each of the four schools who has made a lasting impression on alumni.

For a complete list of eligible faculty members and nomination guidelines, go to: www.salisbury.edu/alumni/facultyawards

#### Fulton School of Liberal Arts DR. CHRYS EGAN — COMMUNICATION ARTS

"Dr. Egan taught an exciting class about technology that had me completely engrossed in the material all semester long, not just because of the topics but the way she presented the, at times, strange material in a very relatable manner."

# Perdue School of Business PAULA MORRIS — MANAGEMENT AND MARKETING

The 2016 Faculty Appreciation Award winners were honored

during SU's 91st-year Fall

Paula Morris, Dr. David Rieck Dr. Janet Dudley-Eshbach, Dr.

Laurie Andes and Dr. Chrys Egan

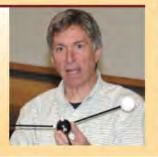

Commencement. (From left) Recipi

"I have never had an educator who was as vested in his or her students' professional and personal successes as Mrs. Paula Morris. She has gone above and beyond the call of duty to provide me with the support and resources I needed to become employed soon after I araduated from SU."

# Henson School of Science and Technology DR. DAVID RIECK — CHEMISTRY

"Dr. Rieck is an outstanding educator and role model for his students. He has inspired many students to continue with their education and pursue graduate degrees. Dr. Rieck deserves a great deal of credit for his good work."

# Seidel School of Education and Professional Studies DR. LAURIE ANDES — TEACHER EDUCATION

"Dr. Andes made the classes interesting. She had so much knowledge and created a fun learning environment. ... She showed a love for teaching reading, the importance in reading and how to make kids love reading."

#### IN MEMORIAM: Dr. K. Nelson Butler (1939-2017)

By Dr. Janet Dudley-Eshbach, SU President

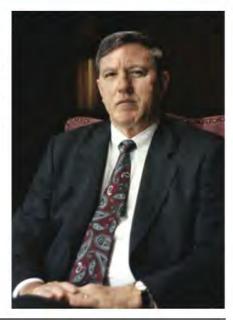

Dr. Butler came from a generation of faculty and administrators at Salisbury University whose dedication and openness to new ideas and programs helped lay the foundation for today's modern campus. A guiding principal of his work was: Would it benefit the students? Would it help others?

He was a man of multiple interests: An athlete with a distinguished background in physical education, he was also a supporter of the arts. He helped to build partnerships between SU and the University of Maryland Eastern Shore; ultimately the campuses won the nationally prestigious Hesburgh Award for their collaboration. He actively supported programs that touched the lives of young and old, from the YMCA to the Eastern Shore Senior Games.

He played key roles in the life of the University as the founding dean of the School of Professional Studies and later vice president of academic affairs, a position he held from 1986-1995. This was a period of remarkable growth for SU, with the endowment of three schools and the opening of several buildings, including the Guerrieri University Center (recently renamed the Guerrieri Student Union) and Fulton Hall.

He was Interim President of the University in 1995-96 during the illness and death of Dr. Thom Bellavance, whom he had served faithfully. Nelson always was willing to go where needed, whether supervising physical education majors in a school setting or courting donors as the interim vice president of advancement.

The depth of his commitment to one institution is a hallmark of the man and his generation. We at Salisbury University, and in the community, are grateful recipients of his legacy.

# **Alum Runs for Germany**

The run to becoming one of the best in the world didn't begin for Luke Campbell '16 his freshman year at Salisbury University in 2012. It didn't begin at Brunswick High School or at his first thought about running competitively. Luke Campbell's run for world relevance began the day he was born – in Germany.

His father, serving in the United States military in Germany, met Luke's mother. The two eventually married and had a baby boy in Germany, giving Luke dual citizenship there and in the U.S.

As he rose through the ranks of track & field here in the United States, becoming the most decorated Division III men's track & field athlete of all time, he needed to forge a path on which he would take the next step.

Campbell finished his time with the Sea Gulls on Memorial Day Weekend 2016, winning the final of his 11 national championships – 10 individually and one as part of a relay team. He won seven high hurdle championships and three in the 400-meter hurdles, while claiming a 4x400-meter relay title at the Division III indoor

championships during his senior season.

He remained in Salisbury to train following his graduation in May 2016, and in the spring 2017, Luke traveled to Germany to train and compete with his club LG Eintracht Frankfurt. Campbell has already gotten a good grasp on the German language and has acclimated to the culture, making his way around the cities and the country – for numerous competitions – easily.

The training regimen of a professional athlete was startling for Campbell, who has been focusing his efforts on the 400-meter hurdles.

"Training has been intense and eyeopening for sure," Campbell said. "Every day I have training; however, the intensity and specificity varies a bit in order for my body to recover when it needs to and to be under the correct stress when necessary."

Campbell improved on his personal-best time twice early in the summer, including a time of 49.40 seconds at the German National Championships to win the title by nearly a full second. Following the national win, Campbell turned his focus to the World Championships in August, with the ultimate goal a trip to the Olympics in Tokyo in 2020.

"Germany is where I was born and where I lived for the first few years of my life," he said. "A good portion of my family lives there as well, so I feel like I missed out on a lot growing up. Having this privilege allows me to reconnect with many aspects of the country. Competing for them would be a great honor, and in my mind, would be the perfect way to pay homage."

# Softball Takes Place in New Nest

The Salisbury University softball program has been one of the best in the nation over the past few decades, and in spring 2017, the program opened a facility whose prestige matches that of its former and current players and coaches.

The new facility replaced the former Sea Gull Softball Field, which had stood on the space at the corner of Bateman and S. Division Streets since the 1970s.

For the teams, the stadium features expanded, heated dugouts, as well as an artificial turf outfield and a clay infield. Both the home and visiting team have access to two batting cages each and a bullpen located near each dugout.

For fans, there is a large seating area that accommodates 500, a new press box with an updated sound system, a permanent ticket booth and permanent restrooms.

Sea Gull Softball Stadium opened on the weekend of March 4 as the team hosted the Sea Gull Classic. Alumni of the program – players, coaching and support staff – got a sneak peak of the facility during an open house on the night of March 3.

With cold temperatures during the open house, the new heated dugouts were well received, as friends and family gathered to see the new set up.

"We had more than 70 alumni show up, which was a great turnout," said Head Coach Margie Knight '79, M'99, who is a Salisbury Athletics Hall of Fame member from her playing days of softball and volleyball. "To be able to see people who I maybe hadn't had time for more than a quick conversation in the past 10, 15 or 20 years, and even seeing the ones that had just walked out of the door a couple months earlier, it was great to be able to spend some time with them."

The next day, the official opening ceremony featured a ribbon cutting and a ceremonial first pitch thrown by SU President Dr. Janet Dudley-Eshbach and additional pitches from the program's alumni. The Sea Gulls won the first game in their new facility,

defeating Clarkson University 5-3, with the play of the game a three-run home run late in the contest from senior Caitlin Lake.

Sea Gull Softball Stadium is part of a multi-year athletics facility upgrade plan that began with the new Sea Gull Stadium, housing the field hockey, football, and men's and women's lacrosse teams. Prior to the 2017-18 season, upgrades to the SU Soccer Complex and a new stadium for the baseball team will be completed.

#### CLASSNOTES

Information received prior to May 1, 2017 M = Master's Degree

#### 1950s

Niel Carey '56 received the Presidential Award of the National Career Development Association for his work as chair of the Government Relations Committee and member of the Steering Committee of a coalition of more than 100 business and education organizations, including the U.S. Chamber of Commerce Education Foundation, which supports strengthening career development in American education.

#### Faculty & Staff Deaths

Ernest "Ernie" Bond (below) passed away on September 20, 2016. Read more below.

**Nelson Butler** (right) passed away on February 15, 2017. Read more on page 24.

Eugene Farace Sr. (right) passed away on September 10, 2016. The founder of the Geography Department at Salisbury University in 1955, he was a devoted mentor to students for over 40 years. His love and devotion to teaching was evident in everything he did. Along with teaching, his passions included traveling the world with his family, friends and students.

Lorraine Kulynycz (Long) (right) passed away December 19, 2016. She dedicated at least 15 years to Salisbury University's Financial Service Office.

John Tyvoll (right) passed away December 6, 2016. He dedicated many years to the Salisbury University Chemistry Department, where he served as the department's chair for his last three years at Salisbury. He taught analytical chemistry and environmental chemistry. Along with teaching, he was the faculty advisor for SU's Field Hockey Club.

#### Dr. Ernie Bond (1963-2016)

By Dr. Patricia K. Dean, Associate Professor, Teacher Education Department
There is an unbearable silence in the Conway Hall Teacher
Education Department. A frequent guffaw and an array of
chortles were often heard throughout the suite as Dr. Ernie Bond
entered the department. We miss many things about our friend,
but the absence of his joyous laughter is a constant reminder
that something is amiss. His empty office is the first one you
spot when you enter the department. Emie passed away
unexpectedly in September 2016. This was his 17th year at
Salisbury University as our children's literature 'guru.' Both
students and faculty spent the fall semester with heavy hearts
as we adjusted to life at Salisbury without him.

His expertise in children's and young adult literature was surpassed by none. He was a scholar — one who published frequently and studied always. His text, *Literature and the Young Adult Reader*, is used by professors across the country. He served as a jurist on several committees, the most prestigious being the Hans Christina Andersen Award. Bond held the position for two years with the International Board for Books for Young People (IBBY). His expertise was recognized in 2006-2007, when he received the University System of Maryland Regents' Award for Teaching Excellence, recognizing exemplary faculty achievement. He was also the Carnegie Foundation's 2007 Maryland Professor of the Year.

In 2005, Dr. Bond, Dr. Laura Marasco and I with two members of the Nature Generation created the Green Earth Book Award. Each year, Ernie would work with me to presort the hundreds of books that arrived, selecting those that fit the criteria and sending them off to selection committees. This year, his absence was felt both in presorting and in choosing the winners. The conference call discussions were less lively and the committees echoed the enthusiasm he

always brought to the process where winners were chosen.

Conway Hall houses the Curriculum Resource Center (CRC), providing over 10,000 resources for students and faculty to check out as needed. Most of the books were donated by Dr. Bond. As Ernie prepared for his children's literature classes, he would spend hours in the CRC.

With his passing, many colleagues suggested the renaming of the CRC to the Dr. Ernie Bond Curriculum Resource Center. The dedication ceremony occurred Friday, April 20, 2017, as part of the Children's and Young Adult Literature Festival. To add to the historical event, Caldecott/Coretta Scott King Award winner Bryan Collier painted a portrait of Dr. Bond. When presenting the portrait, Collier stated, "I chose this photo to paint because it showed the sparkle in his eyes." It has been hung in the newly named CRC.

On April 22, 2017, the 18th Children's and Young Adult Literature Festival was held. The title of the festival was, "Celebrating the Legacy of Dr. Ernie Bond." Ten authors were present; most of them knew Ernie and shared "Ernie Stories" during their presentation. Literature friends from New Zealand and Australia sent video memories of Ernie to show during the event.

As Abraham Lincoln once soid, "It's not the years in your life but the life in your years." Ernie lived life large.
